### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Doran Pace on March 13, 2007.

#### In the claims:

Claim 1 (Amended). A method for detecting or determining the interaction of a first CFTR polypeptide with a second CFTR polypeptide, said method comprising:

- (a) providing a first polynucleotide encoding a fusion protein comprising all or a portion of a first CFTR polypeptide and a DNA binding domain of a transcriptional activator that can bind to a site on a detectable gene, wherein said first CFTR polypeptide comprises a first nucleotide binding domain (NBD 1) of a CFTR polypeptide, or a functional fragment of said NBD 1;
- (b) providing a second polynucleotide encoding a fusion protein comprising all or a portion of a second CFTR polypeptide and a transcriptional activation domain of a transcriptional activator that can activate transcription of said detectable gene, wherein said second CFTR polypeptide comprises a first nucleotide binding domain (NBD1) of a CFTR polypeptide, or a functional fragment of said NBD 1;
- (c) incorporating said first and second polynucleotide into a host cell comprising said

Art Unit: 1636

detectable gene wherein transcription of said detectable gene is under control of said transcriptional activator;

(d) expressing said polynucleotide encoding said first CFTR polypeptide and expressing said polynucleotide encoding said second CFTR polypeptide under conditions in which said detectable gene is expressed when said NBD 1 of said first CFTR polypeptide and said NBD 1 of said second CFTR polypeptide interact; and

(e) detecting transcription of said detectable gene or expression of the gene product of said detectable gene.

Claim 6 (Amended). The method according to claim 1, wherein one or both of said CFTR polypeptides comprises amino acid ~~residue~~ residues 351 through 650 of the human CFTR protein sequence.

Claim 37 (Amended). The method according to claim 32, wherein one or both of said CFTR polypeptides comprises amino acid ~~residue~~ residues 351 through 650 of the human CFTR protein sequence.

Claim 50 (Amended). The host cell according to claim 45, wherein one or both of said CFTR polypeptides comprises amino acid ~~residue~~ residues 351 through 650 of the human CFTR protein sequence.

Also, as requested by Applicant, the Examiner has reviewed the drawings and finds them acceptable.
